Tips for Bountiful Books

Watch the video on the Innovation Hub YouTube channel on how to assemble the Concertina book.

When aligning your charisma sheets, delete the small section on the top left of the cutting file once it is loaded, then group everything. This will allow you to move the file around better.

Cut each Charisma file from a coloured, heavy weight cardstock of your choice. Use as a backing for your Charisma cuts to add structure and support.

Each project's Charisma is ordered alphabetically, starting with A, as your back mat and works forwards to create the book.

Each project has a set of unique backing papers included which you could cut into to create different layers for your project.
