</tbody>
</table>

**Additional materials:** 28cm of 6mm Dowling & Doeflex

**Base**

1. Using the Side, Top and Base pieces, assemble by gluing the tabs to the corresponding sides.
2. Mat the Grass pieces to the bottom edge of the Base section.
3. Using the Door pieces, mat the detailed Door piece to the solid Door piece, then mat the thin frame piece to the front of this.
4. Glue the completed door to one side of the Base – this will be the front of the windmill.
5. Glue the Balcony Sides to the edges of the Balcony Base and glue together at the sides.
6. Glue the completed Balcony to the top of the Base section.

**Middle**

1. Using the Side, Top and Base pieces, glue the tabs to the corresponding sides to assemble, ensuring to alternate the different Side pieces.
2. Using the Windows, mat the detailed Window pieces to the solid Window pieces, then mat the frame pieces to the front of this.
3. Glue the frames to the corresponding cut-outs on the Side pieces.
4. Glue the completed Middle section to the centre of the completed Base section.

**Continued overleaf**
1. Using the Sails pieces, glue the circle areas together to create a cross shape. Glue the remaining circle piece to the front. You may want to use construction board or mat several pieces together to make this section strong.

2. Using the dowling, slot into the hole in the middle of the Sails and use glue to secure in place.

3. Take one of the doeflex discs and thread onto the dowling, leaving a 1cm gap after the Sails.

4. Take the largest Top and Base piece (this will be the base) and glue the Front and Base pieces to opposite sides.

5. Using the Side pieces, glue to the remaining edges of the base and glue all sections together at the sides.
6. Take the Top section from step 5 and glue to the top of the Middle section.

7. Take the Sails and thread the dowling through one of the holes in the top section. Thread another Disc piece onto the dowling so it sits flush at the back of the hole in to top section. This is to hold the dowling in place.

8. Continue to push the dowling through the Top section so it goes through the other hole at the back.

9. Thread another Disc piece onto the dowling to secure it in place.

10. Using the Vane pieces, mat the circle to the large piece and fold along the score lines to give the piece shape.

11. Thread the remaining Disc piece onto the dowling leaving an approximately 4cm gap after the last disc, then thread the Vane on and glue in place.

12. Glue the Top piece to the top of the Top section to finish.
Russian Doll

Cutting List
